JADE SORIANO

BACKEND ENGINEER

Philippines (UTC+8) | Open to Remote Work | Flexible Timezone

jadesiguasoriano@gmail.com | jadessoriano.github.io/me | github.com/jadessoriano

SUMMARY

Backend Engineer with over 3 years of experience building scalable web applications using PHP and Laravel. Experienced in remote collaboration, async communication, and working with distributed teams across different timezones. Skilled in secure system development, RESTful APIs, and database optimization. Proven ability to mentor developers and deliver high-quality solutions independently with minimal supervision.

TECHNICAL SKILLS

PHP, Laravel, Rust, React, Next.js, TypeScript, MySQL, Redis, Docker, WebSockets, RESTful APIs, Git, Linux

PROFESSIONAL EXPERIENCE

Full-Stack Developer
Aug 2024 — Present

Betrnk Tours Inc. — *BGC Taguig, Philippines*

- Built a real-time multi-player tournament platform (Laravel, Next.js, Redis, WebSockets) with live leaderboards, multi-table game synchronization, multi-currency wallets, and role-based admin panel
- Designed secure third-party API integration with HMAC-SHA256 verification, Redis-backed state caching, OTP auth, and internationalization (4 languages)
- Leveraged AI-assisted development (Claude Code) to accelerate delivery — automated test generation (38% → 74% coverage), parallel debugging workflows, and architectural planning
- Deployed via Docker with CI/CD, queue workers, scheduled tasks, and WebSocket infrastructure

Laravel Developer
Mar 2024 — Jul 2024

ThinkBIT Solutions — *Full Remote*

- Worked fully remote with a distributed team using async communication tools (Slack, Jira, Git)
- Upgraded legacy Laravel apps to newer versions and refactored codebases to follow current conventions
- Conducted code audits to identify vulnerabilities and implemented security patches

Jr. Software Developer
Jul 2022 — Feb 2024

Halcyon Digital Media Design Inc. — *Pasig City, Philippines*

- Developed and maintained web applications using PHP and Laravel; built RESTful APIs for frontend and third-party integrations
- Collaborated with UI/UX designers to implement responsive interfaces using Vue.js

PROJECTS

AgentFlow — Visual AI Pipeline Builder
github.com/jadessoriano/agent-flow

- Desktop app for building and running Claude Code agent pipelines with a drag-and-drop canvas, real-time execution streaming, cost tracking, and git-native team collaboration
- Built with Tauri v2 (Rust), React 19, TypeScript, SQLite, Zustand, and React Flow; CI/CD with cross-platform builds (Linux, macOS, Windows)

TestGap — AI-Powered Test Gap Finder
github.com/jadessoriano/testgap

- Rust CLI that scans codebases with tree-sitter AST parsing, identifies untested functions across 5 languages (Rust, JS, TS, Python, Go), and uses Claude API for risk assessment
- Supports JSON/Markdown output, CI integration with --fail-on-critical, severity-based filtering, and configurable analysis via .testgap.toml

EDUCATION

Bachelor of Science in Information Technology

Pamantasan ng Lungsod ng Pasig (PLP) — Pasig City, Philippines
